

Employment	Columbia University, Department of Computer Science	
	Lecturer in Discipline Associate in Discipline	January 2019 - present July 2018 - December 2018
Education	Carnegie Mellon University, The Robotics Institute	
	Doctor of Philosophy, Robotics Master of Science, Robotics - Thesis: Extensions of the Principal Fiber Bundle Model for Locomoting Robots - Completed Future Faculty Program at the Eberly Center for Teaching Excellence	August 2018 May 2015
	University of California, Berkeley	
	Bachelor of Science, Electrical Engineering and Computer Science (EECS) - Graduated with highest honors (<i>summa cum laude</i>) - Completed EECS Honors Program, minor program in Physics	May 2012
Teaching	Columbia University	
	COMS 4701, Artificial Intelligence Total enrollment 180. Course evaluation 4.23/5, instructor evaluation 4.53/5. COMS 4733, Computational Aspects of Robotics Total enrollment 115. Course evaluation 4.52/5, instructor evaluation 4.59/5. COMS 3251, Computational Linear Algebra Total enrollment 199. Course evaluation 3.91/5, instructor evaluation 4.28/5. COMS 4701, Artificial Intelligence Total enrollment 267. Course evaluation 4.68/5, instructor evaluation 4.85/5. COMS 3251, Computational Linear Algebra Total enrollment 126. Evaluations unavailable due to COVID-19 pandemic. COMS 4701, Artificial Intelligence Total enrollment 358. Course evaluation 4.25/5, instructor evaluation 4.45/5. COMS 4733, Computational Aspects of Robotics Total enrollment 80. Course evaluation 4.09/5, instructor evaluation 4.41/5. COMS 3203, Discrete Mathematics Total enrollment 102. Course evaluation 3.89/5, instructor evaluation 4.28/5. COMS 4701, Artificial Intelligence Total enrollment 301. Course evaluation 4.06/5, instructor evaluation 4.21/5.	Summer 2021 Spring 2021 Fall 2020 Spring 2020 Fall 2019 Spring 2019 Fall 2018
	Carnegie Mellon University	
	16-384, Robot Kinematics and Dynamics Course developer and TA with Prof. Howie Choset. www.robotkinematics.org	Fall 2013 - Summer 2018
Grants	Collaboratory Fellows Fund Received \$100,000 over three years with Yi Zhang (Columbia IEOR) for the development of an interdisciplinary, data-driven decision-making course. The course will cover ideas and examples from artificial intelligence and business analytics to give students a solid foundation in decision theory, dynamic programming, reinforcement learning, and model estimation. Applications will include practice with real data sets for business analytics.	August 2020 - present
Research	Columbia University Currently pursuing several directions of research related to robot locomotion and reinforcement learning. We are interested in integrating geometric methods with model-based and model-free learning methods. Our ultimate goal is to develop locomoting robots that can learn in real time and in real life.	August 2018 - present

Carnegie Mellon University

September 2012 - August 2018

Advisor: Prof. Howie Choset. Expanded applicability of geometric methods for modeling and controlling locomoting systems, including wheeled, snake, and swimming robots. We applied intuitive motion planning techniques to systems that deviate from ideal conditions, such as those with passive joints or those that have to coordinate their degrees of freedom with environmental interactions. We also validated the newly established theory through experiments on simple but representative robots, such as a multi-link wheeled snake robot with compliant joints.

University of California, Berkeley

February 2011 - February 2012

Advisor: Prof. Stuart Russell. Developed and tested a seismic inference system in accordance with the Comprehensive Test Ban Treaty Organization (CTBTO) to detect nuclear explosions and seismic events worldwide; first system of its kind to use Bayesian inference. Implemented algorithms and computation through parallel and distributed computing on Amazon EC2, with results of up to 30 times speedup.

Fellowships	National Defense Science and Engineering Graduate (NDSEG) Fellowship	2014 - 2017
	Jim & Donna Gray Endowment Award (UC Berkeley)	2011 - 2012

Service	CS@CU Bridge to MS Program in Computer Science Program Director, 2019 - present	
	Advisor for Columbia undergraduate student groups, including Application Development Initiative (ADI) Labs and Columbia Space Robotics, as well as undergraduate and MS students on independent research projects	
	Reviewer for refereed journals, including MDPI Robotics, IEEE T-ASE, and NODY, and refereed conferences, including ICRA, IROS, CDC, ACC, DSCC, among others.	
	Mentor for undergraduate students (including international) participating in the Robotics Institute Summer Scholars (RISS) program to perform research in the laboratory.	
	Organized tour groups of Robotics Institute labs, including for K-12 students of the Big Brothers Big Sisters of Greater Pittsburgh program.	

Professional Affiliations	Tau Beta Pi , Initiated CA-Alpha Chapter, Fall 2009
	IEEE-Eta Kappa Nu , Initiated CA-Alpha Chapter, Spring 2009

Skills	<i>Programming/Tools</i> : Python, Java, C, Mathematica, MatLab, L ^A T _E X
	<i>Languages</i> : English, Mandarin, Cantonese, conversational Spanish
